

Web 3.0 Technology Company

*“We are builders specializing in Blockchain Domains and Exclusive NFT marketplace across Blockchains. We aim to create interoperable Blockchain Domains with enhanced use cases.”*

## **Bictory Domains** <https://www.bictory.domains/>

We are revamping those **complex wallet addresses** into **human-readable wallet domains**.

We map Blockchain by renaming long numeric and alphabetic wallet addresses with human-readable words and numbers across L1 and L2 chains. Our interoperable approach means that our products can be used across multiple chains, allowing users to seamlessly move assets between different networks. This level of flexibility currently needs to be improved in many existing Web3 solutions.

# Bictory NFT Marketplace <https://bictory.io/>

We're Uniting creators, collectors, and sports for the future - **exclusively!**

Bictory NFT Marketplace is an exclusive Digital/Physical NFTs platform that brings together artists, athletes, celebrities, brands, blockchain domains, and NFT collectors. With a white-label solution tailored for the new era of collectors, BictoryNFT offers a unique opportunity to explore the realms of sports, esports, fashion, and beyond.

Built on the Solana blockchain, the marketplace ensures lightning-fast transactions and minimal fees, making NFTs more accessible. This scalable platform presents your business or brand with lucrative opportunities to engage in revenue-producing activities.
